# Monthly Performance Report

## May 2018

**Incidents are subject to change with validation**

This report refers to April 2018 (M1) data unless otherwise stated

All data is based on LONDON Clinical Commissioning Groups only, unless otherwise stated.

This data is correct as of 10<sup>th</sup> May and is subject to change.

# EXECUTIVE SUMMARY

## Ambulance Response Programme – Definition & Overview

Since February 2015, three other ambulance services - South West, Yorkshire and West Midlands - have been involved in trials led by NHS England of the new standards. They focused on four main areas:

- Identifying the most seriously ill patients as early as possible through processes known as Pre-Triage Sieve and Nature of Call.
- Giving control room staff more time (up to 240 seconds) to assess incidents through a process known as Dispatch on Disposition.
- Developing new clinical code sets and response categories using the best available clinical evidence.
- Developing new targets, indicators and measures.

*The trials have also been independently reviewed by the University of Sheffield.*

Category	Percentage of calls per Category	National Standard	How long does the ambulance service have to make a decision?	What stops the clock?
Category 1	8%	<ul style="list-style-type: none"> <li>• 7 minutes mean response time</li> <li>• 15 minutes 90<sup>th</sup> centile response time</li> </ul>	The earliest of: <ul style="list-style-type: none"> <li>• The problem being identified</li> <li>• An ambulance response being dispatched</li> <li>• 30 seconds from the call being connected</li> </ul>	The first emergency vehicle that arrives on scene stops the clock. (There is an additional Category 1 transport standard to ensure that these patients also receive early ambulance transportation)
Category 2	48%	<ul style="list-style-type: none"> <li>• 18 minutes mean response time</li> <li>• 40 minutes 90<sup>th</sup> centile response time</li> </ul>	The earliest of: <ul style="list-style-type: none"> <li>• The problem being identified</li> <li>• An ambulance response being dispatched</li> <li>• 240 seconds from the call being connected</li> </ul>	If a patient is transported by an emergency vehicle, only the arrival of the transporting vehicle stops the clock. If the patient does not need transport, the first emergency vehicle arriving at the scene of the incident stops the clock.
Category 3	34%	<ul style="list-style-type: none"> <li>• 120 minutes 90<sup>th</sup> centile response time</li> </ul>	The earliest of: <ul style="list-style-type: none"> <li>• The problem being identified</li> <li>• An ambulance response being dispatched</li> <li>• 240 seconds from the call being connected</li> </ul>	If a patient is transported by an emergency vehicle, only the arrival of the transporting vehicle stops the clock. If the patient does not need transport, the first emergency vehicle arriving at the scene of the incident stops the clock.
Category 4	10%	<ul style="list-style-type: none"> <li>• 180 minutes 90<sup>th</sup> centile response time</li> </ul>	The earliest of: <ul style="list-style-type: none"> <li>• The problem being identified</li> <li>• An ambulance response being dispatched</li> <li>• 240 seconds from the call being connected</li> </ul>	Category 4T: If a patient is transported by an emergency vehicle, only the arrival of the transporting vehicle stops the clock.

The new standards are intended to:

- Prioritise the sickest patients quickly to ensure they receive the fastest response
- Ensure national response targets to apply to every patient for the first time – so ending ‘hidden waits’ for patients in lower categories
- Ensure more equitable response for patients across the call categories
- Improve care for stroke and heart attack patients through sending the right resource first time.

Due to the nature and impact of these changes, the previous performance measures are not comparable. However, NHS England have published National Standard for a number of the key measures which are included here.

# EXECUTIVE SUMMARY

## Ambulance Response Programme – Performance Summary

	C1 Mean (00:07:00)	C1 90 <sup>th</sup> Centile (00:15:00)	C1T Mean (00:19:00)	C1T 90 <sup>th</sup> Centile (00:30:00)	C2 Mean (00:18:00)	C2 90 <sup>th</sup> Centile (00:40:00)	C3 90 <sup>th</sup> Centile (02:00:00)	C4 90 <sup>th</sup> Centile (03:00:00)
Previous month (M12)	00:07:24	00:11:58	00:13:13	00:22:48	00:23:21	00:49:21	02:52:50	02:36:36
Last month (M1)	00:06:51	00:11:15	00:11:34	00:19:31	00:16:55	00:33:16	01:49:52	02:05:05
Current YTD (2018/19) * from 1st April 2018 – 30th April 2018	00:06:51	00:11:15	00:11:34	00:19:31	00:16:55	00:33:16	01:49:52	02:05:05

- A total of **90,372** incidents were provided with a face to face response.
- **Category 2** incidents reached a total of **50,041**. This accounts for 55% of face-to-face responses.
- **8,193** incidents were categorised as **Category 1** and provided with a face-to-face response.

- April shows **all 6 key** performance measures **achieving** response times **within** the various National Standards.
- April shows **91%** of calls received into EOC were **answered within 5 seconds**.
- C3 90<sup>th</sup> centile measure saw the most significant improvement in performance. This was from just under 3 hours in March to 2 hours 49 seconds in April.

# Performance Overview

## Response Times by Category

### Category 1

The NEW Category 1 (C1) measure is expected to comprise of approximately 8% of all incidents and covers a wider range of conditions than the former Red 1 category. These are to be responded to within an average time of seven minutes.

Fig 1.1 shows the time taken to respond to patients triaged as Category 1 (C1)

- The grey line shows the LAS 90<sup>th</sup> centile response time.
  - The dotted grey line shows the National Standard of 15 minutes 90<sup>th</sup> centile response time.
- The blue line shows the LAS **daily** average (mean) response time
  - The dotted blue line shows the National Standard of 7 minutes average (mean) response time.

### Category 2

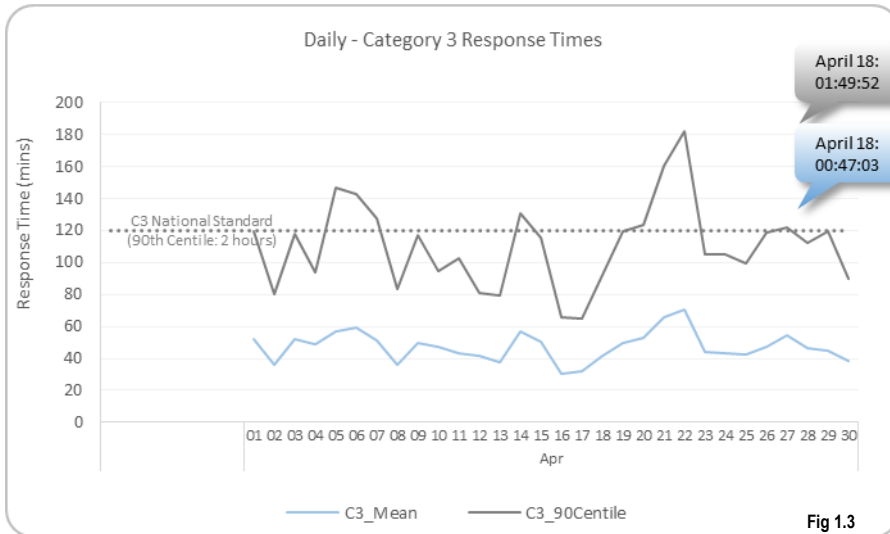

The NEW Category 2 (C2) measure is expected to comprise of approximately 48% of all incidents. These are to be responded to within an average time of 18 minutes.

Fig 1.2 shows the response time for patients triaged as Category 2 (C2)

- The grey line shows the LAS 90<sup>th</sup> centile response time.
  - The dotted grey line shows the National Standard of 40 minutes 90<sup>th</sup> centile response time.
- The blue line shows the LAS **daily** average (mean) response time
  - The dotted blue line shows the National Standard of 18 minutes average (mean) response time.

# Performance Overview

## Response Times by Category

### Category 3

The NEW Category 3 (C3) measure is expected to comprise of approximately 34% of all incidents.

Fig 1.3 shows the time taken to respond to patients triaged as Category 3 (C3)

- The grey line shows the LAS 90<sup>th</sup> centile response time.
  - The dotted grey line shows the National Standard of 120 minutes (2 hours) 90<sup>th</sup> centile response time.
- The blue line shows the LAS **daily** average (mean) response time.
  - There is no National Standard for the mean response time.

### Category 4

The NEW Category 4 (C4) measure is expected to comprise of approximately 10% of all incidents.

Fig 1.4 shows the response time for patients triaged as Category 4 (C4)

- The grey line shows the LAS 90<sup>th</sup> centile response time.
  - The dotted grey line shows the National Standard of 180 minutes (3 hours) 90<sup>th</sup> centile response time.
- The blue line shows the LAS **daily** average (mean) response time.
  - There is no National Standard the mean response time.

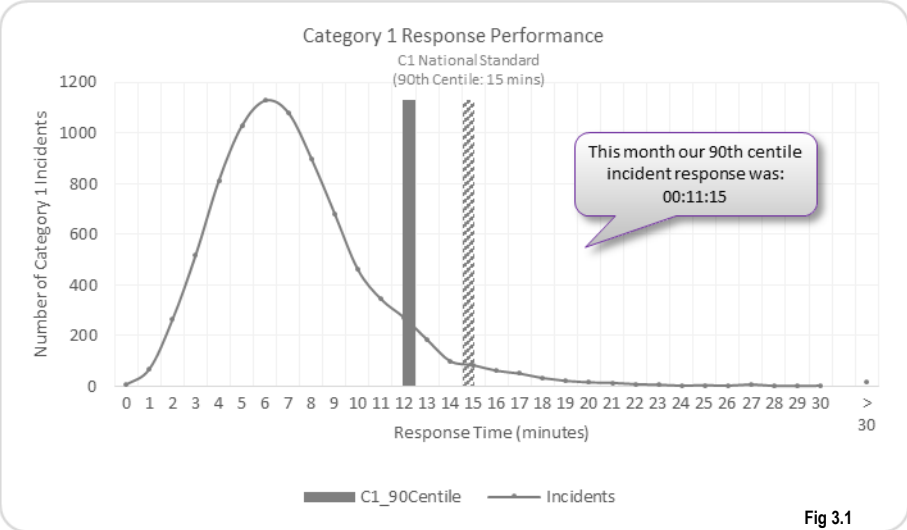

# Performance Overview

## Demand by Category

# Performance Overview

## 90<sup>th</sup> Centile Performance

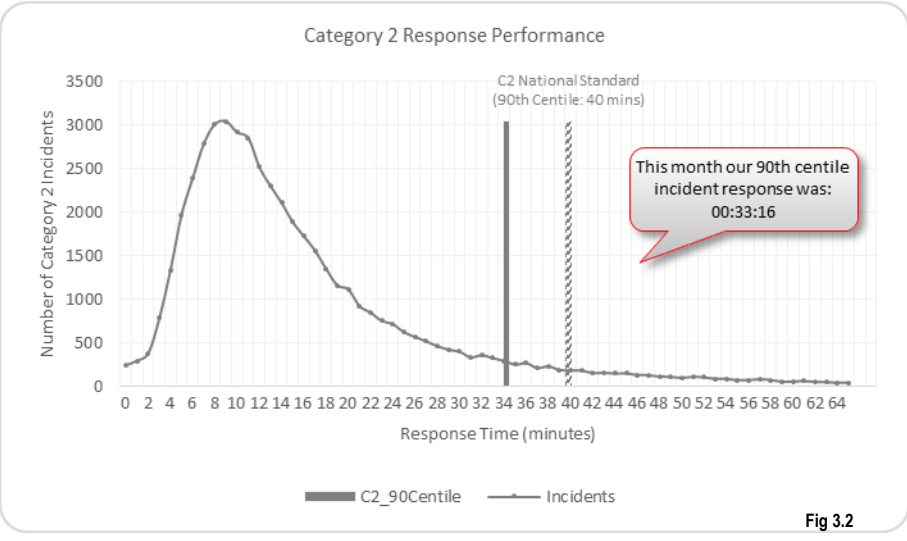

- Fig 3.1 Demonstrates the response distribution for Category 1 incidents.

The 90<sup>th</sup> centile response time in **April** was **00:11:15** minutes, **within** the 15 minutes National Standard as set out in the guidelines by NHSI.

Of the 8,193 incidents requiring a Category 1 response, 7,374 incidents received a face to face response within 00:11:15 minutes.

The LAS 90<sup>th</sup> centile has been **consistently within the 15 minutes** standard **each week** since ARP was implemented.

- Fig 3.2 Demonstrates the response distribution for Category 2 incidents.

The 90<sup>th</sup> centile response time in **April** was **00:33:16** minutes, **within** the 40 minutes National Standard as set out in the guidelines by NHSI.

Of the 50,041 incidents requiring a Category 2 response, 45,031 incidents received a face to face response within 00:33:16 minutes.

April 2018 is the second time this measure has performed **within** the national standard, **since ARP** began in November 2017 (**00:36:28**)

# Performance Overview

## 90<sup>th</sup> Centile Performance

Category 3 Response Performance

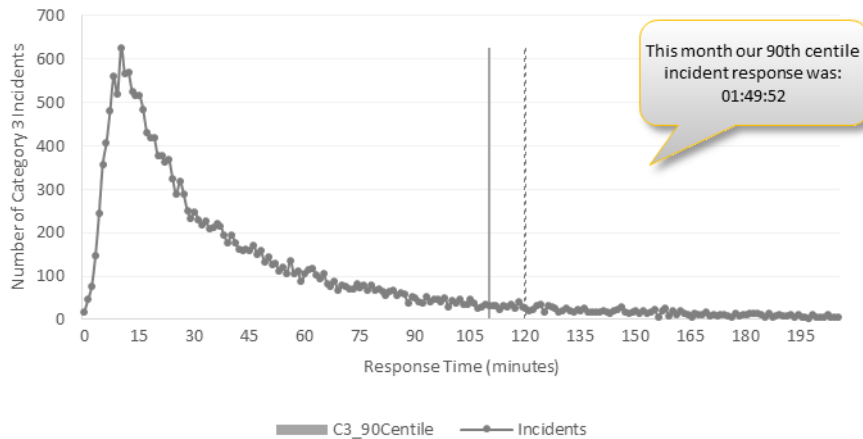

Fig 3.3

■ Fig 3.3 Demonstrates the response distribution for Category 3 incidents.

The LAS 90<sup>th</sup> centile response time in **April** was **01:49:52**

This is **within** the 120 minutes (2 hours) National Standard as set out in the guidelines by NHSI.

Of the 21,277 incidents requiring a Category 3 response, 19,228 incidents received a face to face response within 01:49:52 minutes.

April 2018 is the first month this measure has performed **within** the national standard, **since the implementation of ARP**.

Category 4 Response Performance

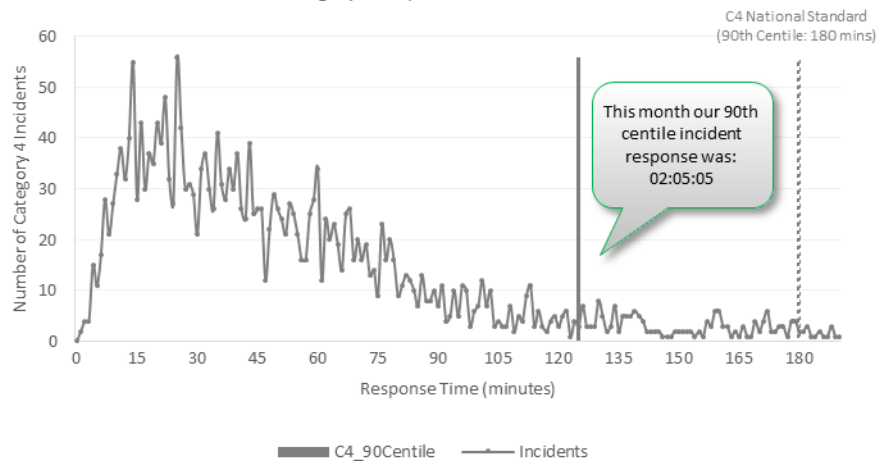

Fig 3.4

■ Fig 3.2 Demonstrates the response distribution for Category 4 incidents.

The 90<sup>th</sup> centile response time in **April** was **02:05:05** minutes, **within** the 3 hours National Standard as set out in the guidelines by NHSI.

Of the 2,633 incidents requiring a Category 4 response, 2,368 incidents received a face to face response within 02:05:05 minutes.

The LAS 90<sup>th</sup> centile has been well **within** the 3 hour standard for the **6 months** since ARP was implemented.

# Performance Overview

## Key Metric Variation

Category	Measure	LAS Monthly Performance (M1)	National Standard	Variance
Category 1	Mean Response Time	<b>00:06:51</b>	7 minutes	<b>00:00:09</b>
	90 <sup>th</sup> centile	<b>00:11:15</b>	15 minutes	<b>00:03:45</b>
Category 2	Mean Response Time	<b>00:16:55</b>	18 minutes	<b>00:01:05</b>
	90 <sup>th</sup> centile	<b>00:33:17</b>	40 minutes	<b>00:06:43</b>
Category 3	90 <sup>th</sup> centile	<b>01:49:52</b>	120 minutes	<b>00:10:08</b>
Category 4	90 <sup>th</sup> centile	<b>02:05:05</b>	180 minutes	<b>00:54:55</b>

# Performance Overview

## Benchmarking - National Picture

M1

Fig 4.1

■ Fig 4.1 Illustrates the Category 1 Mean Response Performance for Ambulance Trusts across England during April 2018.

Additional information also displayed :  
 The National Standard (00:07:00)  
 The average for England (00:07:38)  
 The ranking position for each Trust

- LAS achieved **6 minutes and 51 seconds** for the **mean** response time for **Category 1** patients. This is **within** the 7 minute national standard.
- LAS ranked **fourth** when compared to 9 other Ambulance Trusts across England.
- LAS also performed **within** the England average by **46 seconds**.

Fig. 4.2 Displays the six key ARP performance measures for each Ambulance Trust across England during April 2018.

- LAS ranked **2<sup>nd</sup>** in the **Category 1 90<sup>th</sup> centile** performance measure, compared to the other Trusts.
- For the **Category 2 mean**, LAS remained **stable ranked at 5<sup>th</sup>** compared to the other Trusts.

	Mean	90th Centile	Mean	90th Centile	90th Centile	90th Centile

# Performance Overview

## Performance by CCG & STP

These tables show 6 key performance measures for April 2018 profiled by STP.

April performance shows the improved performance compared to March. This improvement could be attributed to the warmer weather experiences and the school holidays over the Easter period. This also follows a similar pattern from previous years

All STP areas remained **within** the national standard for almost all key measures.

- The **C3 90<sup>th</sup> centile** performance in the **North Central** STP, although **just above** the national standard, shows the **highest improvement** of over 1 hour 25 minutes.
- C4 90<sup>th</sup> centile** in the **South West** STP was the only measure to increase. (by just over 2 minutes) Despite this increase this measure remains **within** the **national standard** of **3 hours**.

(M1) STP Position	C1 Mean (00:07:00)	C1 90 <sup>th</sup> Centile (00:15:00)	C2 Mean (00:18:00)	C2 90 <sup>th</sup> Centile (00:40:00)	C3 90 <sup>th</sup> Centile (02:00:00)	C4 90 <sup>th</sup> Centile (03:00:00)
North Central	00:06:47	00:10:46	00:17:54	00:35:27	02:05:50	02:02:31
North East	00:07:00	00:11:18	00:17:05	00:33:05	01:57:16	02:13:36
North West	00:06:44	00:11:16	00:17:10	00:34:14	01:56:23	01:58:06
South East	00:06:54	00:11:27	00:15:31	00:30:13	01:32:42	02:01:11

# Performance Overview

## Call Answering Performance

Call Answer Response Measures in April

Calls Answer within 5 seconds during April

■ Figure 5.1 demonstrates **three key measures** for call answering under the Ambulance Response Programme (ARP).

- 120,868 calls were received into the EOC in April 2018 (M1).
  - 120,868 calls have been received into the EOC in for the YTD.
- During April the median call answering was **zero seconds**.
  - This means **50% or half** of all calls received into the Emergency Operations Centre (EOC) were answered **immediately**.
- The **95<sup>th</sup> centile** was **39 seconds**.
  - In other words 95 out of every 100 calls were answered in less than 39 seconds.
- This is a **considerable improvement** compared to the performance in March 2018. The dotted lines demonstrate this improvement.

■ Figure 5.2 shows the percentage of calls answered within five seconds.

- 90,372 incidents received a face-to-face response in April 2018 (M1).
  - 90,372 incidents received a face-to-face response for the YTD.

The new ARP standards no longer use this performance measure and for that reason there is longer a requirement to report it.

However, to illustrate the graph shows the daily call taking performance in the month.

- In April **91%** of all **calls** received into the EOC were answered **within five seconds**. This is a significant improvement when compared to previous months.
- **Calls answered within 5 seconds** achieved **over 90%** for 20 of the 30 days in April.
